The Neo-Freudians and How Their Theories Differ From Freud's . The Neo-Freudians included Karen Horney, Alfred Adler, and Erik Erikson.; Horney rejected Freud's notion of penis envy and presented her own theory that was centered on basic anxieties and neurotic needs.; Adler developed a theory based on the presumption that feelings of inferiority were the driving force behind human behavior.

Final exams are stressful for many students--and it's no wonder. Finals are designed to allow students to demonstrate how much information they have retained from an entire semester. When it comes to preparing for finals, every subject is a little bit different, so you should specialize your study skills for each particular exam.

In fact, one of the most impactful study strategies is distributing studying over multiple sessions (Newport, 2007). Intensive study sessions can last 30 or 45-minute sessions and include active studying strategies. For example, self-testing is an active study strategy that improves the intensity of studying and efficiency of learning.
