Answers should include some reference to the greater the sequence divergence, then the less DNA sequence they have in common so the organisms are not as related. Those with low divergence share a lot of DNA in sequence and are more closely related. 17. Fill in the phylogenetic tree below with Samples 1 through 4 to

The advent of DNA technology has given scientists the tools with which to examine how closely related certain species are. DNA analysis allows scientists to construct phylogenetic trees whose branches link together the relatedness of different organisms. Model 1 – Phylogenetic Trees. Millions of Years Ago

Phylogenetic trees - Practice Exam Questions ...

Darwin drew a phylogenetic tree in his notebook in 1837, with the caveat “ I think ” written in the margin.² The first use of the word phylogenetics appeared in 1921 in a paper on New Zealand stoneflies.³ Phylogenetics was not completely codified into a classification system until 1950, but the idea of a branching tree of life was
